

**BUCKLEY**  
FENCE

*The World's Finest Horse Fence.*

## STEEL BOARD GATE

The Steel Board Gates perfectly match the fence, using the same materials and height. Popular and compatible with all other fence systems.

### *Sag, Pinch, and Hinge Free*

The gate rests on top of the included round post on the built in dual bearing system. The gate post engages the upper bearing assembly inside the gate which allows the gate to open and close easily and quietly.

### *Leveling Mechanism*

After the gate is placed on the gate post and engages the upper internal bearing, the gate is leveled by rotating the lower bearing.

### *Gate Sizes*

4', 8'5" and 12' openings in 3 or 4-rail.

The gates can be installed individually or as doubles to maximize the gate opening area.

Latch with EZ Latch® for fast access, ground anchors, or a combination for the best of both.

Dual Gate with Swinging Gate Latch™

EZ Latch® mounted to gate

Single Gate with EZ Latch®

### *Our Exclusive Swinging Gate Latch™*

An **EZ Latch®** housing is mounted onto a gate that has a ground anchor.

This allows for quick opening and closing of one gate and the ability to open both when needed. Exclusive with **Buckley Fence**.

### **EZ Latch®**

This "horse proof" latch will prevent even the most curious horse intent on escaping. It's unique design features include:

**Two-Way Operation** Makes it easy to open and throw the gate closed from either direction while on your horse.

**Prevents Gate Lean** Latch pin rests on the latch plate when the gate is closed, alleviating weight on the gate post.

**Corrosion-Free** Made of aluminum alloy with stainless steel roller and mount fasteners.

**Fully Adjustable** Horizontal and vertical adjustments can be made anytime during or after installation.

**Universal Use** The EZ Latch® fits a wide range of fence types including our Steel Board Fence and any other vinyl, wood or pipe style fence. It includes provision to use a standard pad lock and a convenient loop to hang the lock when not in use.

### **From the President & Founder**

We continue to develop solutions at Buckley Fence, LLC that complement and enhance fencing systems. And invite you to contact us to see what Buckley Fence, LLC can do for your project.
